

LET'S TALK ABOUT  
**NUT SACKS**  
OURS AND YOURS!

## We're nuts about quality

When it comes to Indy's Nuts, every batch gets inspected, every sack gets handled, every nut gets checked before it ships.

Indy's Nuts is also a **health awareness campaign**. *(Pause for effect.)*

Indy's Nuts was created by **Fennec Pharmaceuticals** and the **Testicular Cancer Awareness Foundation** to get you—yes, YOU—to read something important about your **actual nuts**.

You're still reading. So ... **it worked**.

## Now about nuts, the ones we're born with ...

**#1**

Testicular cancer is the **leading cancer** in men ages 15-44

*(It's one of the **most curable** if you detect it early)*

**95%**

of testicular cancer patients who **detected it early** are alive 5 years later

**Detecting it early means checking your nuts. Monthly. When warm. Right after a shower.**

That's about 60 seconds of your life. Less time than you spend deciding what to watch online. So go ahead, grab your sack.

Feel something new? Something different? A lump?  
**Talk to your doctor.**

**Scan here. Learn stuff.  
Check your nuts.**

Scan to learn more about testicular health and how you can help protect your hearing during cancer treatment.

**IF YOU OR SOMEONE YOU LOVE HAS BEEN DIAGNOSED WITH TESTICULAR CANCER,  
YOU NEED TO HEAR THIS!**

Testicular cancer is often treated with cisplatin chemotherapy. And look—it works. It delivers a knockout blow to cancer. But treatment can come with permanent side effects.

Here's what nobody warns you about **before treatment starts:**

**Cisplatin can cause permanent hearing loss.**  
**It's called cisplatin-induced ototoxicity — CIO.**  
**It affects more people than you may think.**

**This isn't "turn the TV up" hearing loss. This is:**

- Missing the voice of someone you love at the dinner table
- Nodding along when you have no idea what was just said
- Avoiding crowded rooms because hearing conversations is impossible
- Music you used to love ... now sounds flat

***If you have to beat cancer, you should be able to hear people tell you how impressive that is.***

If you or someone you know is starting or is currently on cisplatin chemotherapy, ask your oncologist about an **FDA-approved treatment** option that may help protect your hearing during treatment or visit **ciotreatment.com**

*This material is for educational purposes only and does not constitute medical advice.*

**Don't shell out your hearing, too. Learn more.**
